Drug Free Racing for Integrity in Sport

Where money is involved there will always be

Drug Free Racing for Integrity in Sport

Threshold vs Screening limit

Threshold

- Accurate quantification required
- Frequent controversies

VS

Screening limit

- Regulatory quantification not required
- Minimize inadvertent and inconsequential violations

The Integrity of Racing in Korea

Brief introduction of the Korea Racing Authority

The Integrity of Racing in Korea

Procedural Fairness
by Stipes & Vets

Corrupt Practice
by Racing Investigator

Disciplinary Committee

Promoting and upholding
integrity
is one of the key functions
of the KRA

The Integrity of Racing in Korea

Current & future KRA medication control

Current

1. All feed and feed additives
2. Pre-entry test
(Ketoprofen oint, Methyl prednisolone)
3. Prerace test : all runners with blood sample(about 29,000 samples per yr)
Seoul 1116 races × Avg. 11runners
Busan 823 races × Avg. 11runners
Jeju 853 races × Avg. 9runners
4. Postrace test : first 3 with urine sample(about 8,300 samples per yr)

Future

Current 4 tests plus

5. Postarrival test
6. Horses in training test
7. In-between Stable transfer test
8. Special medication instructions for IR horses

Recent Adoption through IR Experience

2014 ~

ASL(Flunixin)

2013 ~

Horsemen's Information for IR

2004 ~

Rules on substances which can be detected more than 10 days

2001 ~

- 10 days rules.
- Change from police arrest into the KRA investigation first

~ 2001

Identical to IFHA Rules

**Cooperating
Department**

Stipes, Vet, Lab

Future Plan

Special medication instruction for international horses

Pre-sending test in the country of origin

Post-arrival test when stabled in the int'l quarantine

stable

Special test when needed

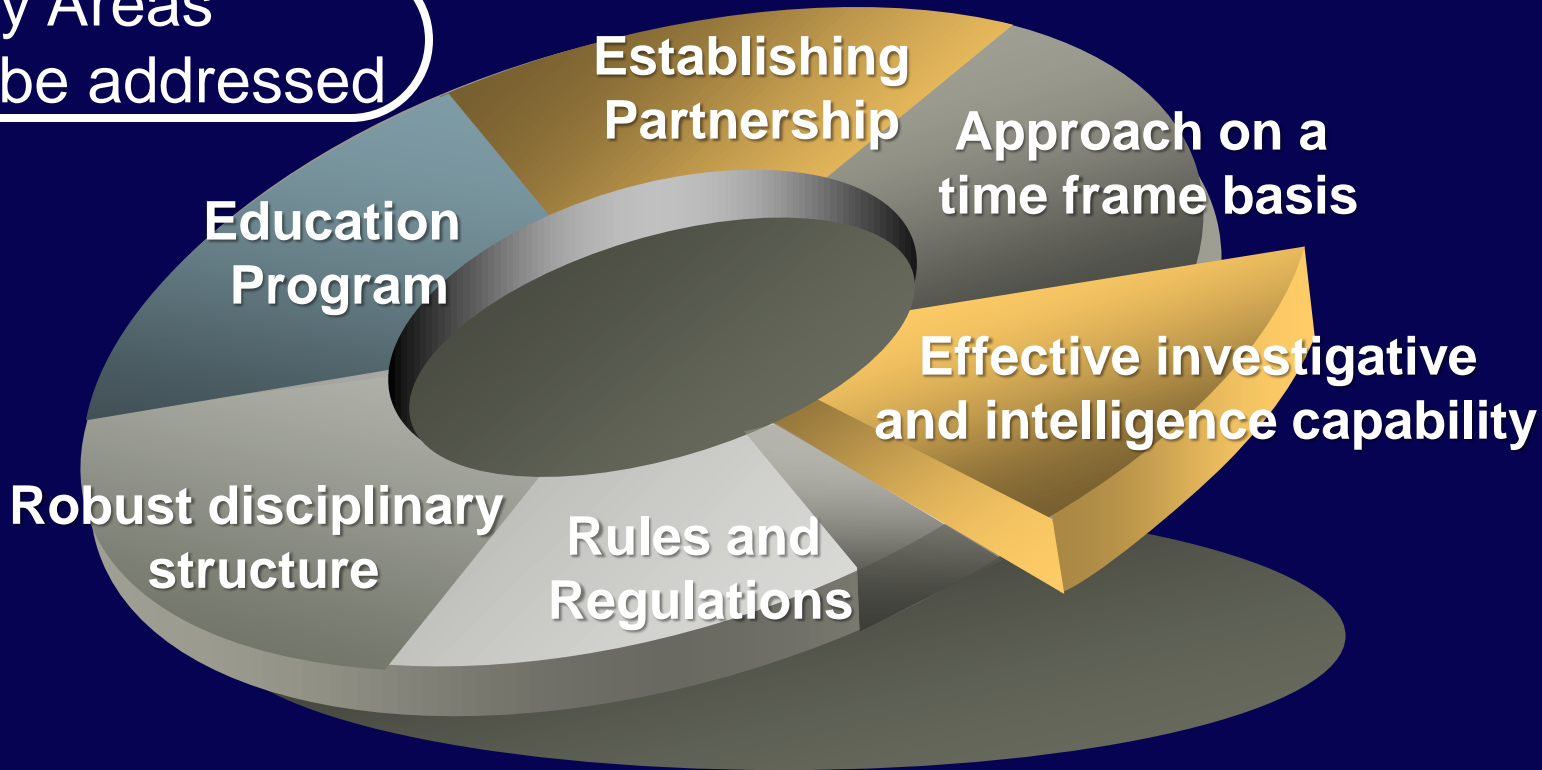

Pre-race test(blood sample)

Post-race test(urine)

Future Plan

Key Areas
need to be addressed

35th ASIAN
RACING
CONFERENCE
HONG KONG 2014

Thank You !
